Argyranthemum
Final Trials Report
2011

Trials Office
The Royal Horticultural Society Garden, Wisley, Woking, Surrey, GU23 6QB
RHS Trial of *Argyranthemum*

**Introduction to *Argyranthemum***

*Argyranthemum*, Greek for ‘silver flower’ is a genus of around 37 species found naturally in the Canary Islands and Madeira archipelagos. They are very closely resemble *Chrysanthemum*, but differ having daisy like flowers; a shrubby habit and are evergreen. Although *Argyranthemum* can be grown outdoors, most are too tender all year round in the UK, These plants are not fully hardy and either requires bringing into a cool greenhouse or being treated as an annual used as part of a bedding schemes, in containers or in borders. They have a long flowering period, usually May through to October or the first frost. The foliage is finely dissected or lobe and can have a bluish green. The daisy-like flowers are borne in loose corymbs and vary from single, anemone-centred, or double. Colours are available in a wide range from white, yellow, pink to apricots.

**Objectives**

The objectives of the trial were:

- To compare new breeding to old AGM varieties.
- Record flowering period and eliminate short day flowering varieties.
- Compare habit and compactness.

**Judging**

The plants were assessed by the Floral Trials Assessment Panel fortnightly, beginning on 12th July 2011. Judging was based on the following criteria:

- Floriferousness
- Continuity
- Habit
- Flower Colour
- Foliage
- How flowers die

**Entries**

There were 107 entries in the trial supplied by growers, breeders, individuals and nurseries from the UK and Europe. Each entry consisted of 3 plants, sent as plugs or cuttings and grown on to 1 litre pots by the propagation department before planting.

**Cultivation**

Whilst being grown on by propagation, all plants were cut back to stop early flowering and encourage a compact, bushy habit. This was done by shearing to a height of about 20cm. Entry 91, believed to be the true ‘Jamaica Primrose’ did not respond to this treatment. Planting was carried out in June into a rotevated bed with no fertilisers or soil improvers added. *Argyranthemum* does not need rich soils to thrive. Smaller entries were planted in groups of three in a triangle whilst larger entries were planted in a line. One plant of each entry was deadheaded fortnightly, but plants received no other treatments. Irrigation pipes were laid and used when necessary.

**Pest and Disease**
No pest problems were encountered. A number of entries showed signs of Chlorosis e.g. entry 77 – tests for chrysanthemum yellow virus were not conclusive.

Other Findings

During the trial it was noted that all plants were substantially larger than those grown in the natural conditions. The panel agreed that the high levels of nitrogen in the soil (the trial bed had previously been used to grow winter squash) cause plants to have greener foliage than is normal in those varieties with blue (glaucous) leaves and stems were not as strong causing some entries to collapse or for stems to snap. The panel took particular interest during the assessment of the need to ‘Deadheading’ each cultivar. There were a number of plants where the visual impression was a marked improvement whilst others no benefit was obvious for what was recognised as a tedious job.

Plants Receiving AGMs during Trial

The following are the plants thought to fulfil the Award of Garden Merit criteria during the trial and to be worthy of receiving the award. The criteria which a plant needs to fulfil in order to receive the award are:

- excellent for ordinary garden use
- available from nurseries
- reasonably resistant to pests and diseases
- of good constitution
- essentially stable in form and colour
- reasonably easy to grow

Hardiness ratings are as follows:

H3 – hardy outside in some regions; needs frost-free protection in winter
H4 – hardy throughout the British Isles
Plants Awarded AGM

Argyranthemum LaRita White Beauty = ‘Kleaf07028’ PBR (LaRita Series)

[Trial No.32] votes 7-2
Habit: Spreading mound, moderately floriferous
Height x spread: (cm): 60 x 80
Foliage colour: Mid Green 137B with glaucous overtones
Leaf pubescence and features: Dull and glabrous, glaucous
Stem colour, pubescence, etc.: Green and glaucous, glabrous
Flower diameter: (mm) 40 Flower colour: Rays White NN155D, disk Yellow 13A, florets opening white with yellow tips.”

“Deadhead to get best display”

Sender: Selecta Klemm GmbH & Co KG

Argyranthemum Molimba XL Duplo White = ’Argydowitis’ (Molimba Series)
[Trial No.33] votes 11-0
Habit: Spreading mound, moderately floriferous
Height x spread: (cm): 60 x 80
Foliage colour: Mid Green 137B with glaucous overtones
Leaf pubescence and features: Dull and glabrous, glaucous
Stem colour, pubescence, etc.: Green and glaucous, glabrous
Flower diameter: (mm) 40
Flower colour: Rays White NN155D, disk Yellow 13A, florets opening white with yellow tips

Comments “Spectacular.”
Sender: Syngenta Seeds

*Argyranthemum frutescens* LaRita Banana Split
[Trial No.36] votes 10-0
Habit: Moderately floriferous, slightly spreading mound
Height x spread: (cm): 40 x 50
Foliage colour: Mid Green 137B
Leaf pubescence and features: Glabrous
Stem colour, pubescence, etc.: Mostly glabrous, one or two hairs on new growth, green, light dull red flush in axils and side shoots
Flower diameter: (mm) 50
Flower colour: Rays pale Yellow 4D, mottled Purplish Red 60B/C about edges and tip, disk Reddish Brown, browner than N34A, opening Yellow 15B

Sender: Selecta Klemm GmbH & Co KG
Argyranthemum Sultan’s Lemon = ‘Supalem’ PBR

[Trial No.38] votes 7-1
Habit:
Description to be completed in 2012.

Comments “Pretty, finely divided foliage
Compact bushes. Dead flowers hidden well.”

Sender: PLA International ApS

Argyranthemum ‘Summer Stars’ (Daisy Crazy Series)
[Trial No. 58] votes 9-1
Habit: Upright bush, moderately floriferous
Height x spread: (cm): 50 x 50
Foliage colour: Mid Green 137A
Leaf pubescence and features: Glabrous, glaucous, moderately thick.
Stem colour, pubescence, etc.: Glabrous, pale green, striate and glaucous.
Flower diameter: (mm) 50
Flower colour: Pale Pink 69C flushed Purplish Pink72D especially on outer rays.

Comments: Comments “Impressive display, good covering of bloom. Upright.”
Sender: Mr A J Robinson

Argyranthemum Cherry Love = ‘Supacher’ PBR (Daisy Crazy Series)
Habit: Spreading mound, floriferous
Height x spread: (cm): 65 x 100
Foliage colour: Blue Green, bit darker than N138A
Leaf pubescence and features: Glabrous, glaucous, moderately thick.
Stem colour, pubescence, etc.: Green, flushed dull Red Grey N187B, darker in places especially axils and striations on pedicel
Flower diameter: (mm) 45
Flower colour: Rays Red Purple 64B fading to pale Purple N74D on older flowers, disk Red 60A opening to a mix of petaloid florets the same colour as rays and tubular florets ranging from 64B to pale Pink 62D

Comments “Very pretty foliage. Nice contrast in flowers and foliage. Good overall effect.”

Sender: Mr A J Robinson

Argyranthemum frutescens Madeira Cherry Red = ‘Bodmadcher’ PBR (Madeira Series)

[Trial No.62] votes 11-0
Final Report for Trial Ref 1899
Habit: Spreading mound, moderately floriferous
Height x spread: (cm): 45 x 70
Foliage colour: Mid Green 137B
Leaf pubescence and features: Glabrous, moderately thick.
Stem colour, pubescence, etc.: Green, dull red flush in axils, fine dark Brown N200A striations on pedicels, glabrous
Flower diameter: (mm) 30
Flower colour: Rays bright Red 53A with white base, ageing to a much duller Purple N84D, disk Orange Red N34A with darker brown central dot, opening to Yellow 16A

Comments “Really pretty. Consistent. Good performing plant.”

Sender: Ball Colegrave

Argyranthemum Madeira Violet (Madeira Series)

[Trial No.64] votes 12-3
Habit: Upright, very floriferous bush
Height x spread: (cm): 70 x 80
Foliage colour: Young leaves Yellow Green 146C, older leaves Mid Green 137A
Leaf pubescence and features: Glabrous
Stem colour, pubescence, etc.: Green, lightly glaucescent, glabrous
Flower diameter: (mm) 45
Flower colour: Rays dark Purplish Red 71A/B finely dotted and streaked white, wholly white at base, disk Orange Brown 175B-C opening Yellow 13A-B

Comments “Looks great! Lots of blooms; Good Late Pink; Dead Flowers hidden well.”

Sender: Ball Colegrave

Argyranthemum Meteor Red (Daisy Crazy Series)
[Trial No.66] votes 12-1

Final Report for Trial Ref 1899
Habit: Spreading mound, moderately floriferous
Height x spread: (cm): 50 x 70
Foliage colour: Yellow Green, greener than 146A
Leaf pubescence and features: Glabrous
Stem colour, pubescence, etc.: Green with fine,
darker green striations, glabrous
Flower diameter: (mm) 40
Flower colour:
Rays bright, rich Red, brighter and redder than
59A, dulling down slightly in older flowers, disk Red
Brown 178B opening to Yellow 12A

Comments “Rich colour when flowers are young.
Flower suits foliage. Cleanest of reds”

Sender: R Delamore Ltd

---

**Argyranthemum Summersong White = 'Supa 594' (Daisy Crazy Series)**

[Trial No.71] votes 15-3
Description to be completed in 2012.

Comments “Good foliage plant. Doesn’t need deadheading”
Sender: R Delamore Ltd

Argyranthemum ‘Starlight’

[Trial No.97] votes 15-0
Final Report for Trial Ref 1899
Habit: Robust, upright to spreading, very floriferous
Height x spread: (cm): 120 x 190
Foliage colour: Dark Green 147A
Leaf pubescence and features: Glabrous above, very sparingly hairy beneath, lightly glaucouscent
Stem colour, pubescence, etc.: Green, glaucouscent, glabrous
Flower diameter: (mm) 70
Flower colour: Rays and outer disk florets pure White NN155D, inner disc florets tipped Yellow 6C

Comments “Beautiful foliage. Flower is different. Super.”
Sender: Mr A J Robinson
Reconfirmed AGMs

**Argyranthemum frutescens subsp. frutescens ‘Whiteknights’**

[Trial No. 29] votes 8-2  
Habit: Grey, bushy, few flowered  
Height x spread: (cm): 45 x 45  
Foliage colour: Greyed Green 187A, newer growth yellower green  
Leaf pubescence and features: Glaucous, glabrous  
Stem colour, pubescence, etc.: Glabrous, green with slightly darker green striations, slight red flush in axils, glaucous.  
Flower diameter: (mm) 40  
Flower colour: Rays pure White NN155D, disk Yellow 15A  

*Comments “Elegant foliage. Flowers evenly spaced.”*

Sender: Mr A J Robinson

Figure 15: Deadheaded

Figure 16: Not Deadheaded
Argyranthemum ‘Petite Pink’

[Trial No.56] votes 13:2
Habit: Dome shaped, long stalked flowers well above foliage, moderately floriferous
Height x spread: (cm): 50 x 80
Foliage colour: Mid Green 137C
Leaf pubescence and features: Glabrous, slightly glaucous and dull, quite thick
Stem colour, pubescence, etc.: Glabrous, glaucous green
Flower diameter: (mm) 40
Flower colour: Rays pale Purplish Pink 75B with deeper 75A ring above a fine white ring at base, ageing paler pink to almost white, disk Orange Yellow 17A

Comments “Delicate and airy. Lovely effect.”
Sender: Wisley Gardens

Argyranthemum ‘Snow Storm’

Final Report for Trial Ref 1899
[Trial No. 76] votes 11-0  
Habit:  
Spreading, very floriferous mound  
Height x spread: (cm): 80 x 130  
Foliage colour: Young leaves Yellow Green 146D, maturing to glaucous Green N138A  
Leaf pubescence and features: Glaucous and dull, glabrous, moderately thick  
Stem colour, pubescence, etc.: Light green, lightly striated, glaucous and glabrous  
Flower diameter: (mm) 40  
Flower colour: Rays pure White NN155D, disk Yellow 14A  

Comments “Light, feathery, dainty. Pretty foliage. Good sized mounds.”  
Sender: Mr A J Robinson  

Argyranthemum gracile ‘Chelsea Girl’
Final Report for Trial Ref 1899

Figure 21: Deadheaded

[Trial No.78] votes 9-1
Habit: Spreading mound of fine foliage, few flowers
Height x spread: (cm): 80 x 120
Foliage colour: Young leaves Yellow Green 144A, maturing to glaucous Green N138A
Leaf pubescence and features: Very fine, segments almost cylindrical, glabrous and glaucous
Stem colour, pubescence, etc.: Green with a slight purple grey flush in axils of and tops of upper branches, glaucous and glabrous
Flower diameter: (mm) 35
Flower colour: Rays White NN155D, disk Yellow 14B, green flush to centre of young florets

Comments “Fluffy looking. Foliage like smoke.”
Sender: Wisley Gardens

Figure 22: Not Deadheaded

*Argyranthemum frutescens* subsp. *canariae*
[Trial No.83] votes 11-0
Habit: Lightly floriferous, bushy plant, flowers in or level with foliage
Height x spread: (cm): 60 x 70
Foliage colour: Mid Green 137B
Leaf pubescence and features: Glabrous, moderately thick
Stem colour, pubescence, etc.: Green, darker striations and dots of greyed red with deeper Red 147B on axil joints with side shoots, light flushing of brown on new shoots, glabrous
Flower diameter: (mm) 60
Flower colour: Rays pure White NN155D, disk Yellow 14A

Comments “Elegant. Be good in a mixed border. Large stems and big flowers.”
Sender: Mr A J Robinson

Figure 23: Deadheaded
Figure 24: Not deadheaded
Recommended AGM Subject to Naming

*Argyranthemum* ‘Jamaica Primrose’
[Trial No.89 ] votes 13-2
Habit: Upright to spreading, floriferous
Height x spread: (cm): 80 x 120
Foliage colour: Yellowish Mid Green 137C
Leaf pubescence and features: Glabrous, glaucescent and quite thick
Stem colour, pubescence, etc.: Glaucous green with unglaucoosed green vertical striations, glabrous
Flower diameter: (mm) 60
Flower colour: Rays bright Yellow 5A, fading to 4C-D in older flowers, disk Orange Yellow 17B

Comments “Continuously in flower. Blue/green flower.”
Sender: Ashwood Nurseries Ltd
[Trial No.90 ] votes 11-0
Habit: Robust and spreading, moderately floriferous, large flowers
Height x spread: (cm): 80 x 130
Foliage colour: Mid Green 137B
Leaf pubescence and features: Glabrous
Stem colour, pubescence, etc.: Green, glabrescent and glabrous
Flower diameter: (mm) 70
Flower colour: Reys bright Yellow 6C ageing to pale Yellow 2D, disk Orange Yellow 15A

Comments: “Good shaped petals. Vigorous. Flowers start yellow and change to primrose.”
Sender: Special Plants

*Argyranthemum* ‘Jamaica Primrose’
Habit: Robust and spreading, very floriferous
Height x spread: (cm): 75 x 160
Foliage colour: Yellow Green 146A
Leaf pubescence and features: Yellow Green 146A
Stem colour, pubescence, etc.: Glabrous, lightly glaucouscent
Flower diameter: (mm) 65
Flower colour: Rays bright Yellow 6B ageing to paler Yellow 5C/D, disk Orange Yellow 17B

Sender: Mr A J Robinson

The following previously awarded Awards of Garden Merit were not reconfirmed and will be considered during the Sunset Review 2012.

*Argyranthemum 'Cornish Gold'* [Trial No.79]
Sender: Kernock Park Plants
