

PANSY AND VIOLA

Two hundred and seventy-four stocks of spring and summer flowering pansies and violas were received for trial at Wisley in 1989. The trial was sown in a seed bed on 4 July 1989. The subsequent seedlings were planted out, where they were to flower, on 29 and 31 September 1989, all flower heads being removed at the time of planting out and once again during October. The plants were spaced in rows 23cm apart each way. Twenty-four plants of each self-coloured stock and 48 plants of each mixed-coloured stock were grown.

The trial was inspected by a sub-committee of Floral Committee 'A' on 21 March, 10 April, 3 May and 5 June 1990, and on its recommendation Council has made the following awards to spring and summer flowering pansies and violas, after trial at Wisley.

The number in brackets after the description of the stock was that under which it was grown in the trial.
